23rd ANNUAL CONFERENCE

WOMEN'S CANCER INITIATIVE - TATA MEMORIAL HOSPITAL

10th - 11th - 12th Oct, 2025

Welcome Delegates,

We are pleased to welcome everyone to the **23rd Women's Cancer Initiative** meeting on **Breast Cancer** to be held between **10th and 12th October in Mumbai**. The management of breast cancer continues to evolve rapidly as we strive to balance between underdiagnosis for the majority and overtreatment for a few, and between treatment-related toxicity, quality of life, and improved outcomes. Overall, the multidisciplinary treatment of breast cancers has substantially improved over the last 50 years, with more systemic therapy options, better radiation techniques, and attention to cosmesis and morbidity in breast cancer surgery. We routinely follow evidence from the West since the majority of the systemic therapy trials have been and are being reported from there. However, there is a distinct difference in the demographic presentation of disease in the West and LMICs like ours. We continue to have a higher percentage of locally advanced disease at presentation and non-screened, symptomatic early breast cancers. This is accompanied by a steadily rising incidence of breast cancer in India. With increasing awareness and the wide availability of screening strategies, there will hopefully be a stage migration in India. Hence, several de-escalation strategies need to be applied in the right context in our setting. Also, evidence for the management of certain advanced-stage diseases is lacking from the West. Hence, Indian guidelines are needed. This year, the theme is **"From controversies to consensus"** in these grey zone areas in the management of breast cancer that are more pertinent to our country, through focused discussions, debates, case-based learning, and panel discussions. A group of eminent oncologists from all over the country will participate in the truly multidisciplinary brainstorming sessions, and there will be an open consensus guideline development at the end of every session. emerging with a manuscript at the end for more India-specific questions.

We hope you will take the opportunity to join us in this sincere academic endeavor and after-hours revelry and will enjoy the program as much as we enjoy making it.

Cheers from the organizing secretaries of **WCI 2025!**

We look forward to your participation.

WOMEN'S CANCER INITIATIVE
TATA MEMORIAL HOSPITAL

23rd ANNUAL CONFERENCE

WOMEN'S CANCER INITIATIVE -
TATA MEMORIAL HOSPITAL

 10th - 11th - 12th Oct, 2025

Conference Highlights

- Comprehensive multidisciplinary program based on key controversial issues in management of breast cancer
- One of its kind pre-conference workshops on “genetic counselling” and “Clinical communications in healthcare”
- Pre-conference surgical workshop on further refining our outcomes by “going the extra mile” to improve breast cosmesis
- “What’s new” workshop in breast imaging and interventions
- Keynote speeches- from reputed international faculties on key novel aspects in breast oncology
- An engaging oration from a leader in their field
- Consensus question discussion after every session- leading to Indian consensus guideline document in difficult scenarios
- Publication of “consensus manuscript” in the “Indian Journal of Cancer”
- Top 3 abstracts to receive prizes and publication of all abstracts in supplement of “Indian Journal of Cancer”
- Conference banquet- in a relaxing venue in the maximum city- to connect, bond and after-hour revelry

Dr. Yazan Masannat

Consultant Oncoplastic Breast Surgeon
Broomfield Hospital, Essex
London Clinic in Harley Street, London

Dr. Yazan Masannat is an award winning Consultant Oncoplastic Breast Surgeon based at Broomfield Hospital in Essex and the prestigious London Clinic in Harley Street in London. He has many areas of specialist interest in Breast Cancer Surgery including Oncoplastic Breast Surgery, Breast Reconstruction, and Revision Surgery after breast cancer treatment.

Yazan has more than 80 peer reviewed publications and has been awarded numerous research grants. He is the Simulation Lead at Broomfield Hospital and a visiting Associate Professor at Anglia Ruskin University, Cambridge. He is also an Honorary Senior Clinical Lecturer at Queen Mary's University of London, and an E-Tutor in the MS Oncoplastic Surgery Program at the University of East Anglia.

He is the Meetings Secretary and an elected member of the Board of Trustees of the Association of Breast Surgery, and a member of the International Committee at the American Society of Breast Surgeons, in addition to being an examiner at the European Board of Surgical Oncology and the European Board of Breast Surgery exams (UEMS).

Yazan is the creator of www.iBreastBook.com which is a free online resource with contributions from many of the leading Breast and Plastic surgeons across the world. The iBreastBook Webinar series, which started during the covid pandemic has been a huge international success. As a result, Yazan is regularly invited worldwide to lecture and teach on the different Oncoplastic Breast Surgical Techniques.

Dr. Shaheenah Dawood

President, UAE Cancer Congress
Co-President, Asia Pacific Breast Cancer Summit (ABCS)
Head, Consultant Medical Oncologist
Mediclinic Parkview Hospital
Dubai

Dr. Shaheenah Dawood is an extremely experienced oncologist. She graduated from Dubai Medical College in 1998 and undertook further training within Dubai Health Authority before attaining a Medical Oncology fellowship from McGill University, Montreal, Canada and the Susan Komen Breast Cancer fellowship from the University of Texas M.D. Anderson Cancer Center, Houston, USA.

She attained her Master of Public Health from the Harvard School of Public Health in 2008 and has over 100 papers to her credit including 34 peer review original articles, 15 review articles and 9 book chapters. She is also an Editorial Fellow of the New England Journal of Medicine and serves as a reviewer for multiple journals including the Journal of Clinical Oncology. She currently serves as President of the UAE Cancer Congress that is held annually in Dubai and is Co-President of the Asia-Pacific Breast Cancer Summit (APBCS).

Dr. Indrani Mukherji (Ghosh)

Oncoplastic Breast Surgeon
Great Western Hospital, Swindon
The John Radcliffe Hospital, Oxford.

Dr. Indrani Mukherji (Ghosh) is a leading Oncoplastic Breast Surgeon working across Great Western Hospital, Swindon and the John Radcliffe Hospital, Oxford.

She is a passionate educator and Surgical Simulation Lead at Health Education England. She is also a Post Graduate Supervisor and MBBS Examiner at Bristol University.

Dr Mukherji combines surgical precision with innovation—her work spans from Breast Conservations, Therapeutic Mammoplasties, Mastectomies, Breast Reconstructions, Lipo-modelling and Lipo-filling to nipple-areolar restoration and 3D micropigmentation.

She is a Gold Medallist in Master of Surgery and MCh Distinction graduate, with fellowships and degrees from premier Indian and British institutions and a Member of RCS, UK.

Beyond operating theatres, she pioneers simulation-based teaching models and promotes early cancer detection, especially among South Asian women and women with 'Learning Difficulties'.

Whether judging medical panels and quality improvement initiatives or leading breast cancer awareness campaigns and charity events, Dr Mukherji is committed to improving lives—both in clinic and in the community.

Dr. Jennifer Croke

Radiation Oncologist, Princess Margaret Cancer Centre
Director of Fellowship, Department of
Radiation Oncology, University of Toronto
Associate Professor,
Department of Radiation Oncology, University of Toronto

Dr. Jennifer Croke is a Radiation Oncologist Clinician Investigator at the Radiation Medicine Program at the Princess Margaret Cancer Centre and an Associate Professor in the Department of Radiation Oncology at the University of Toronto. Dr. Croke completed her residency training in Radiation Oncology at the University of Ottawa, followed by a clinical research fellowship at the University of Toronto specializing in Gynecologic Malignancies.

In addition to her clinical work, Dr. Croke holds a Master's in Health Professions Education from Maastricht University (2018). Her clinical focus is in managing breast cancers and gynecological malignancies, including performing brachytherapy procedures. She serves as the Breast Site Lead within the Radiation Medicine Program at the Princess Margaret Cancer Centre.

As an educator, Dr. Croke is the Director of the Fellowship Program and Director of Equity, Diversity, Inclusion, and Professionalism within the Department of Radiation Oncology at the University of Toronto. Her academic interests include patient education, survivorship, patient-reported outcome and mentorship.

Dr. Carlotta Becherini

MD, MSc – Radiation Oncologist
Florence
Italy

Dr. Carlotta Becherini is a radiation oncologist based in Florence, Italy, where she practices at the Radiation Oncology Unit of Azienda Ospedaliero-Universitaria Careggi and collaborates with the Department of Experimental and Clinical Biomedical Sciences at the University of Florence. She is actively involved in clinical care using advanced radiation techniques such as IMRT, VMAT, SBRT, adaptive radiotherapy, and brachytherapy, with a particular focus on breast cancer, head and neck tumors, and stereotactic treatments. Dr. Becherini holds a Master's Degree in Drug and Radiotherapy Combinations, a qualification that supports her specialized interest in integrating systemic therapies with radiotherapy in both clinical and research settings. She is part of the ESTRO Focus Group on Systemic Therapy and Radiotherapy Combinations, where she contributes to shaping international standards for the safe and effective use of combined modalities in cancer treatment. Nationally, she serves on the Scientific Committee for the Italian Breast Cancer Guidelines, helping define evidence-based protocols and treatment pathways. Her scientific work includes co-authorship of several high-impact publications and consensus documents, including an ESTRO-endorsed international consensus on integrating systemic therapies with radiation in breast cancer, a Delphi-based national consensus on breast reconstruction and radiotherapy timing, and expert contributions on moderate and ultra-hypofractionation approaches. She is particularly engaged in advancing partial breast irradiation techniques, both in clinical application and in research efforts aimed at refining patient selection and optimizing treatment planning. Dr. Becherini takes part in international congresses and expert panels dedicated to breast cancer care, contributing her clinical experience and research expertise to the ongoing development of multidisciplinary treatment strategies.

Dr. Trupti Kulkarni

Consultant Breast and
Head and Neck Radiologist
British Society of Breast Radiology
United Kingdom

Dr. Trupti Kulkarni MBBS, MRCS (Edin.), FRCR is a Consultant Radiologist at Manchester University NHS Foundation Trust (Wythenshawe), serving since 2013. She trained at Grant Medical College (Bombay University), earning an MS in General Surgery (2000), MRCS (2004), and later attained her FRCR in 2011 following radiology training in the UK. Her clinical expertise spans breast and head & neck imaging—conducting one stop symptomatic and screening clinics, image guided interventions (stereotactic, tomosynthesis, MRI, ultrasound), CT/MRI reporting, and leading multidisciplinary team meetings.

An academic peer reviewer for Clinical Radiology, The Breast, BMJ and others, she has contributed to trials such as PREVENT (focused on breast screening uptake in South Asian women) and the SMALL vacuum excision study. As Training Programme Director for the North West School of Radiology and Education Lead for the British Society of Breast Radiology, she serves on faculty and exam boards (PLAB, FRCR 2B, advanced MRI), develops online content, and mentors consultants. Her international educational work includes workshops and student teaching projects across India, Singapore, Nigeria, Ghana, Uganda and Ukraine.

Dr. Maninderpal Kaur

Consultant Radiologist
Head - Dept. of Breast Imaging
Hospital Kuala Lumpur

Dr. Maninderpal Kaur is Malaysia's foremost expert in breast imaging and a regional driving force behind the nationwide adoption of Contrast-Enhanced Mammography (CEM) and CEM-guided biopsy. As Head of Breast Imaging at one of Malaysia's busiest breast centres, she has pioneered integration of AI platforms like Lunit AI and 3D Quorum into routine workflow, elevating diagnostic precision on a national scale.

A respected trainer and Key Opinion Leader across the Asia-Pacific, she has mentored radiologists and radiographers across seven countries and authored two international textbooks on CEM (Springer). Under her leadership, HKL has become a premier regional training hub.

Dr. Kaur is an international speaker with presentations and workshops at major congresses including SBI (Singapore), EUSOBI (Germany), Congresso Nacional de Mastologia (Mexico), Egyptian Breast Imaging Congress (Cairo), BISICON (India), CEM Immersion Congress (Italy), and others across Australia, Thailand, Sri Lanka, and Hong Kong.

Dr. Pooja Jagmohan

Senior Consultant
Head of Division of Breast Imaging
Department of Diagnostic Imaging
National University Hospital
Singapore

Dr. Pooja Jagmohan is a senior consultant at the Department of Diagnostic Imaging, National University Hospital, Singapore and Assistant Professor, Department of Diagnostic Radiology, Yong Loo Lin School of Medicine at the National University of Singapore. She heads the Division of Breast Imaging at NUH and is NUH's Clinic Director and lead radiologist for Breast Screen Singapore, Singapore's national breast screening programme and member of the BSS operations committee. She also holds adjunct appointment as Senior Consultant at the National University Cancer Institute.

Dr. Pooja did her initial medical and radiology training in India. She subsequently trained in Singapore and attained specialist accreditation in Singapore followed by a breast radiology fellowship at the Medical University of Vienna. Apart from clinical work she also takes a keen interest in research including contrast enhanced mammography and Artificial intelligence; and breast radiology education.

Dr. Nisha Sharma

Consultant Breast Radiologist
Director of Breast Screening Leeds/Wakefield
Chair of the Research, Innovation and
Development Access Committee (RIDAC)

Dr. Nisha Sharma is Director for Breast Screening at Leeds & Wakefield the 14th Largest breast screening unit and Consultant breast radiologist at Leeds Teaching Hospital NHS Trust, Chair of the Research and Innovation Development Access Committee (RIDAC) for national breast screening programme & Clinical advisor to NHS England related to breast screening issues and Professional Clinical Advisor for breast quality assurance visits. She is passionate about using innovation to improve the patient pathway.

She developed the national guidelines on how to manage high risk lesions diagnosed within breast screening with vacuum assisted excision rather than surgery, which has been adopted at a national level and was also involved in writing the EUSOMA guidelines on how to manage high risk lesions in Europe. This change in pathway has meant many women can avoid a surgical operation.

She is active in research and audit. She has over 100 peer reviewed publications. She is the radiology lead for the SMALL trial and Tadpole trial. These trials focus on minimising overtreatment. She is working with artificial intelligence looking at AI assessment of quality of mammograms, diagnostic role in 2D and 3D mammograms and in ultrasound. She also has an interest in breast density.

She conducted the first prospective trial in breast screening looking at the impact of AI on arbitration rates.

She is the audit lead for the British Society of Breast Radiology, scientific committee member for EUSOBI and scores abstracts for RSNA, ARRS, ECR, Eusobi and BSBR. She is an invited national and international speaker, covering many topics such as high risk lesions, CEM, DBT, breast MRI, AI and the axilla.

Topic

Introduction and Welcome address by President, WCI
Dr. Sudeep Gupta

**Session 1: Conundrum of nodal management-
post-chemotherapy**

Chairpersons:

Dr. Vani Parmar, Dr. S. K. Srivastava, Dr. Indrani Mukherjee

Session Coordinator: Dr. Divya d'Silva/Dr. Pallavi Khurud

Management of N1→N0 axilla post-chemotherapy
Speaker: Dr. Asha Reddy

Debate

LYMPHA should be done in all patients undergoing a
complete axillary lymph node dissection

For: Dr. Jay Anam

Against: Dr. Sanjith Agarwal

Discussion and rebuttal

Prophylactic internal mammary nodal irradiation: what do
we know so far?

Speaker: Dr. Revathy Krishnamurthy

Debate

N3 nodal disease needs surgical resection of extended lymph
node basin for optimal disease control

For: Dr. Neha Choudhary

Against: Dr. Shagun Mishra

Discussion and rebuttal

Video-assisted thoracoscopic (VATS) internal mammary
lymph node dissection—is there a scope in breast cancer?

Speaker: Dr. Sabita Jiwnani

Consensus Questions

Dr. Divya d'Silva/Dr. Pallavi Khurud

Tea Break

Session 2: Management of axilla in early breast cancer

Chairpersons:

Dr. SVS Deo, Dr. Tanweer Shahid, Dr. Yazan Masannat

Session Coordinator: Dr. Toshita Jain
